

### SpyeSmoke

Medium Grey in color, the SpyeSmoke rear projection film is one of the sturdiest of the Spye Diffusion rear projection suite, with a protective release layer on the film for easy application. SpyeSmoke offers reduced hot spotting, and great viewing angles.

### SpyeDark

The darkest of the Spyefilms, SpyeDark is a dark grey, high-contrast screen with a wide viewing angle. High in color contrast, and rich blacks are what make this screen exceptional. Engineered to reduce hot-spotting, SpyeDark has a high-tack adhesive great for bonding directly onto glass or acrylic and protection layer for easy installation.

### APPLICATIONS

- Retail and In-store window displays and shopping malls
- Hotel lobbies and meeting rooms
- Corporate lobbies and boardrooms
- Houses of worship
- Sports arenas
- Trade shows and exhibitions

### Care and Cleaning

To keep the screen in good condition, do not use any cleaners with Ammonia, Alcohols, or any industrial cleaning fluids!

You may use a dilution of 1 part Sparkle window cleaner to 10 parts of water. Even though Sparkle has some alcohol in it, it is diluted enough not to harm the surface of the screen. Dry by blotting with a clean cloth or paper towel. Call if you have any questions.

#### Do not clean with:

- Ammonia
- Alcohol
- Window Cleaners
- Kitchen Compounds
- Acetone
- Gasoline
- Benzene
- Carbon Tetrachloride
- Lacquer Thinner
- Vinegar
