

### Product Description

GlassMovie, our highest quality diffusion film, is dark grey in color and provides the highest level of ambient light fighting properties within our diffusion rear projection suite. GlassMovie also offers the added benefit of superior viewing angles (up to 100°). This is one of the few films that offers a bright picture from both the front and the rear. GlassMovie allows for the use of short throw and off-axis projection.

### APPLICATIONS

- retail and in-store window displays
- exhibits and tradeshow
- corporate lobbies and board rooms
- museums
- airports and travel centers
- houses of worship

### Durability and Shelf Life

Based upon accelerated aging studies and outdoor exposure, the manufacturer offers a 5 year usable life estimate under conditions experienced in vertical exposure and in “normal” temperature climates. \*Exposure to severe temperatures and ultraviolet light, such as tropical or desert climates, will cause more rapid deterioration. This also applies to pollution, high altitude, horizontal and/or south facing exposure. Shelf life is 2 years when stored at 15° to 25°C and ±50% relative humidity.

Physical Properties	Face Material	polymeric translucent vinyl
	Adhesive	high quality acrylic solvent based
	Liner	white kraft paper
	Thickness (face material + adhesive + liner)	.01”
Working Temperature	During Application	+10°C to +40°C or +50°F to +104°F
	End Use	-40°C to +90°C or -40°F to 194°F
Minimum Lumen Requirements	Indoor	185 lumens/square foot
	Outdoor	550 lumens/square foot
	Direct Sunlight	750 lumens/square foot
Sizes	Sold by the linear inch off a 48” roll. Custom sizes and shapes available upon request.
